

TRUE TRACK REC.

The sound of the past with the perfection of the future.

T M C

The Tube Master Compressor is a totally hand built unit of the absolute highest quality providing the ultimate in professional standards available today. Designed for recording, mixing and mastering, it's principle of construction is based upon the classic compressor like the Fairchild 660/670 and, like these classics units, the Tube Master Compressor delivers the same unmistakable smooth, natural yet amazingly effective limiting and compression.

TUBE MASTER COMPRESSOR

THE TUBE MASTER VCA has a pure class-A operating push-pull stage. By using matched quartets of tubes, the symmetrical construction's incredibly simple and short signal flow insures minimum distortion and the highest quality sound. The input and output transformers are built on two separate coils delicately hand wound over a MU-metal core. This structure combination provides an extremely high bandwidth and dynamic range with the highest impulse characteristics. The 20 position switches with GOLD PLATED contacts
